EDUCATION

Brigham Young University, Provo — B.A. *Computer Science*

Expected graduation December 2021

PROFESSIONAL EXPERIENCE

Level 11, Seattle WA — *Software Intern*   Summer 2018 & Summer 2019

- Created a fully-automated test suite for a Fortune 500 client that covered 100s of API calls between app and connected services, integrated the test suite to Jira and automated the test suite to run regularly.
- Created version 2 of a pre-existing QA tool, adding API functionality
- Identified problems with vendor solutions by running comparison tests. Used data visualizations to make recommendations to management.

Voicebox Technologies Inc, Bellevue WA — *Software Intern*   Summer 2015

- Created interactive data visualization using Tableau to identify product enhancement opportunities
- Designed and delivered a recipe search program utilizing an external API to demo as a potential feature
- Created syntax models to work with the Voicebox's Natural Language Understanding system
- Educated other Software developers on the API and recipe search program
- Performed QA tests for Natural Language Understanding AI model
- Created product marketing video including demos and competitive analysis
